

HAIVALA CONCRETE TOOLS

Long handle float

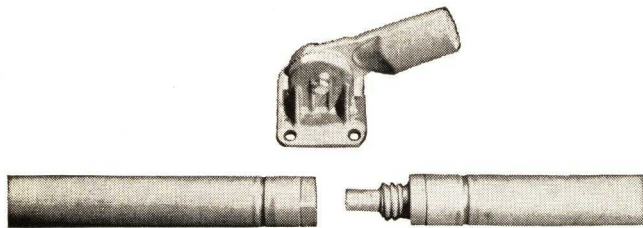

The Haivala float line is designed to process freshly poured concrete to a suitable condition for troweling or finishing to whatever surface a job specification may call for. The float blade is of a strong, cast magnesium alloy, having exactly the right texture and shape to hold sufficient fat at the surface of the concrete so the final finish will not check or peel. Proper use of this float will eliminate excessive use of driers and topping on the final finish. These tools are light weight, easy to use, and extremely durable.

Specifications

Item No.	Size	Net weight, lbs.
54KFM	53" x 6 3/4"	10
48KFM	48" x 8"	8
42KFM	42" x 8"	7

Adjustable handle bracket

The adjustable handle bracket is furnished with each float. Handles are priced separately and are available in 6-foot and 4-foot take down sections. Construction is of 1 1/4-inch round magnesium tubing with threaded fittings at each end.

Specifications

6' mag. handle	approx. net weight	4 lbs.
4' mag. handle	approx. net weight	3 lbs.
No. H-12 adj. brkt.	approx. net weight	1 lb.

Combination float

The combination float pictured above is used to penetrate freshly poured concrete in which a coarse rock aggregate is used. On the forward stroke with the corrugations to the rear this tool will submerge the rock below the troweling surface. The return stroke will mop out the corrugations in the slab, leaving a smooth surface for final finish. Construction is of the same cast magnesium as the flat tool described and the same handle assembly is used.

Specifications

Item No.	Size	Net weight, lbs.
40COMP	40" x 7 1/4"	8 1/2
1/8" corrugations	3/8" center to center	
38COMP	38" x 6 1/2"	7
1/16" corrugations	3/8" center to center	

Hand float

The Haivala cast magnesium hand float is probably the most popular and widely used cement finishing tool on the market today. It's excellent design and extremely light weight make it adaptable to practically every cement finishing job. Like the larger tools, it is constructed of durable, light weight, cast magnesium for ease of handling and years of service.

Specifications

Item No.	Size	Net weight
HF-16	16" x 3"	20 ozs.

Thirty-inch darby

The 30-inch darby pictured here is a perfect companion tool to the hand float. It's extra length makes it quite useful on small slab work where the finisher has to reach out to areas inaccessible with the smaller hand tools. This tool has excellent balance and the light weight for ease of handling.

Specifications

Item No.	Size	Net weight
D-30	30" x 2 1/2"	2 lbs.
D-36	36" x 3"	3 lbs.
